AI Systems Architect & Quantitative Developer with deep expertise in architecting autonomous AI multi-agent swarms, training proprietary financial Transformer LLMs, engineering PyTorch Deep Reinforcement Learning (Actor-Critic) quant trading bots, and deploying high-performance 3D WebGL geospatial platforms.

LEADERSHIP & ENGINEERING

// 2024 - PRESENT

Founder & Lead AI Systems Architect — DONA AI / Dona Codex

2024 - PRESENT

Directing end-to-end research and deployment of multi-agent cognitive swarms, proprietary financial Transformer models, high-frequency futures trading bots, and open-source MCP benchmarking platforms.
